

Improving health and well-being for better society

THE 3RD ICASH

Health and well-being is a fundamental right of every human being. Governments of every nation responsible for providing facilities and supporting policies to enable people accessing health care services whilst researchers as key providers in serving evidence-based studies to lay the foundation for the government and policymakers addressing the health problems.

We invite researchers, scientists, practitioners, professionals, and students working in Asia and Pacific region to share their expertise, experiences, and views to gain a better understanding of the most critical health issues.
